

To Whom It May Concern,

I recently heard the news that The National Association of Broadcasters (NAB) is seeking to stop XM and other satellite radio companies from offering local traffic and weather to it's users. I urge you to reject the petition.

Sattelite has as much right to be competitive in this market as any other company. They offer the consumer, who is paying for a service, a great alternative to radio. Let the companies compete, and don't allow this petition to go through. It's not only unfair, it's unconstitutional.
